Exploring Soil Health & Soil Carbon Credits

FIELD DAY

OCTOBER 23, 2025

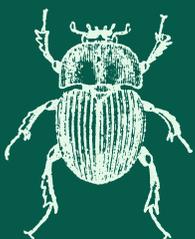

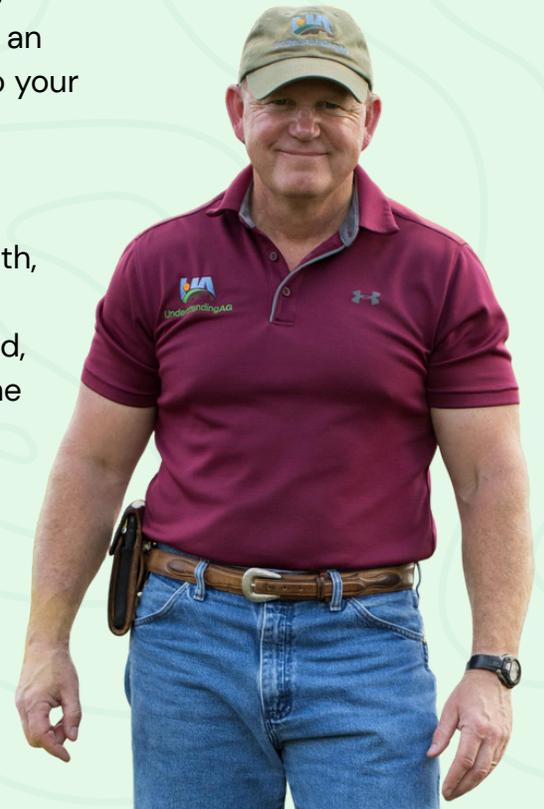

Join us for an engaging and informative Field Day hosted by **Grassroots Carbon** and the **Wildlife Habitat Federation**. This special event brings together ranchers, conservationists, and land stewards to explore how regenerative grazing supports soil health and creates opportunities in soil carbon credit markets.

We're honored to be hosted by **Loy Sneary**, a dedicated steward of the land whose ranch near Bay City, TX, is a working example of the power of healthy soils and thoughtful grazing management. Loy's commitment to conservation and sustainability makes his ranch an ideal setting for this event. Thank you, Loy, for welcoming us onto your land!

We're also thrilled to welcome **Dr. Allen Williams** to the event. A nationally recognized expert in regenerative grazing and soil health, Allen brings decades of hands-on experience and a deep understanding of how nature-based practices can transform land, livelihoods, and ecosystems. His insights are invaluable for anyone looking to make meaningful change on working lands, and we're fortunate to have him join us for this special day.

Location: Sneary Cattle Ranch
2295 FM 1468 South
Bay City, Texas 77414

Time: 10:00AM - 2:00PM

RANCHERS PAID.
GRASSLANDS RESTORED.
LONG LIVE THE DUNG BEETLE.
